Endeavour
by freund-germany.com

The new Endeavour range of trimming machines

Precision engineered and manufactured to the highest standard - now in Germany. A full range of depth control and standard open faced hand pieces are available with either electric or pneumatic motors.

The unique design of the new Endeavour even allows the trimming head to be interchanged between the electric and the pneumatic motors, without modification.

Whatever your requirement, finishing meat-cuts, slicing salmon, or the simple removal of excess fat from beef or pork, Endeavour is the precision trimmer for every operation.

- 1 35A Bone Trimming Small Bones

Pneumatic

The challenging new pneumatic hand piece offers increased power while still retaining improved comfort to the operator. Increasing life performance of wearing parts by requiring only 6 months servicing reduces running costs and increases yield.

Endeavour

by freund-germany.com

Adaptive

The Adaptive System can be used on any trimmer motor unit. The modular System fits to other motor drives offering a low cost trimming alternative with reduced investment. It fits to all Bettcher®-Whizard®-Motors and any standard size hand-piece can be supplied.

MiniCut

- Excellent for Kebab and Smoked Salmon slicing
- Easy to install, operate and maintain
- Fine depth adjustment for exact thickness required
- Easy to remove motor unit when cleaning
- Will accept all sizes of handpiece (35-128)
- Low-cost motor-units (2900 pm) for smaller budgets
