

Why Coats®

COATS® is a patented glove coating technology infused with Natural Colloidal Oatmeal, designed to protect and repair skin while you work.

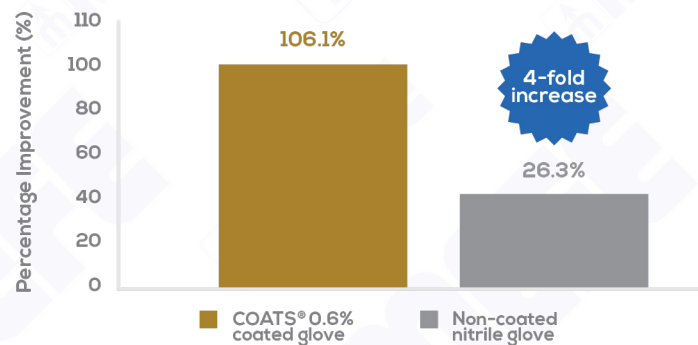

Gloves user usually suffer from dry and irritated skin due to prolonged glove use and frequent hand washing

MEFE's Commitment to Hand Protection

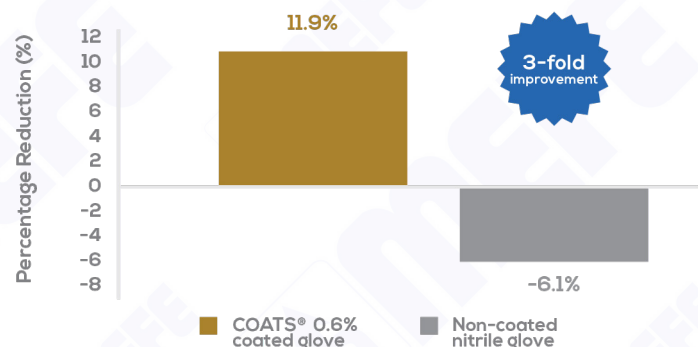

- ✓ Manufactured using a PATENTED glove coating technology
- ✓ Made from 100% ALL NATURAL colloidal oatmeal, an FDA-recognised skin protectant.
- ✓ CLINICALLY-PROVEN to act as a skin protectant and repair damaged skin.
- ✓ CERTIFIED GLUTEN FREE glove that is safe for individuals with Coeliac disease or gluten sensitivities.

Efficacy of COATS® Gloves

Improvement in Skin Hydration

COATS® gloves demonstrated a 4-fold increase in skin hydration improvement compared to non-coated nitrile gloves, with a remarkable 106.1% improvement from baseline.

Reduction in Water Evaporation

COATS® gloves showed a 11.9% reduction in water evaporation as opposed to 6.1% increase in water evaporation observed in non-coated nitrile gloves. The higher the water loss, the greater the likelihood for skin damage.

Moisturising

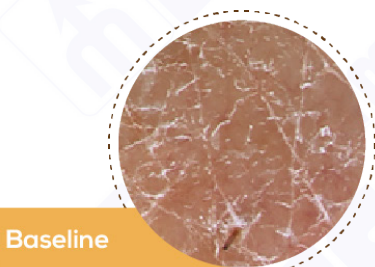

Hold moisture in the outer most later of the skin through occlusive and water binding properties

Protecting

Forms a viscous occlusive barrier to protect from external irritants

Soothing

Relieves inflammation, irritation and itch, which facilitates skin healing
